

# Schoolology

**Schoolology (sko-luh-jee)**—Schoolology is a *private* learning management system (LMS) that has tools for teachers to create content for students to use. In Schoolology, teachers can post information, assignments, quizzes, videos, links, or discussions. Students log in and respond within Schoolology for either just the teacher to see (assignments, assessments) or for sharing with their class (discussions). Content is organized in different **courses** or subjects. Parents can see student work and activities via the Schoolology app on the student iPad.

## [How Parents Can Navigate Schoolology](#)

The power of using Schoolology with students is

- Content is shared in one place for all subject areas
- Important notices can easily be sent to students
- Schoolology connects with google apps
- Youtube videos are viewed within Schoolology (no ads)
- Homework can be shared for home viewing
- Students can access posts at home to complete
- Self-paced courses can be set up for individual progress
- Teachers can track student progress
- Discussion posts engage students and allow them think time before posting
